

*****Vote Alert: Vote No on H.R. 3962, the so-called Affordable Health Care for America Act*****

*The Center for Fiscal Accountability WILL RATE a vote against the so-called
Affordable Health Care for America Act*

The Center for Fiscal Accountability urges all Members of the United States House of Representatives to vote NO on H.R. 3962.

America cannot afford this costly takeover of the health care industry under the guise of “Affordable Health Care for America,” which will grow the size and scope of government to an unprecedented and unsustainable level, with no beneficial results.

While Speaker Pelosi claims that her bill “only” cost \$894 billion over ten years, the real cost will be much higher. Already, there have been admissions that billions more on higher spending for public health, a reinsurance program to hold down retiree health costs, payments for preventive services and more were added. Further the package adopts a shenanigan played by Sen. Reid on the Senate side by taking ‘doc fix’ out of the equation – and in doing so disguising the real price tag of this costly package.

Adding insult to injury, the bill contains fourteen new tax increases the worst one of which is a new 5.4 percent surtax which will fall most heavily on small business profits.

While heaping massive costs on the American taxpayer, the bill does not even achieve its goals of universal coverage, leaving 18 million still uninsured. Americans deserve better, less costly and more effective “reform.”

Taxpayers cannot afford H.R. 3962 - vote NO!
